Eriez® Offers Free Food Industry E-Newsletter

Erie, Pa. — Eriez® announces the availability of the company’s new, free e-newsletter for the food processing industry. [“The Eriez Orange Connect Food e-newsletter”](#) helps industry professionals stay informed about the newest magnetic, vibratory and inspection products available for food processing,” says Dave Heubel, Eriez National Sales Manager.

“The food industry faces unique challenges during processing, including how to protect product purity and handle materials in the most efficient, economical and sanitary way,” says Heubel. “The Eriez Orange Connect Food e-newsletter was developed to provide readers with information to help them run more streamlined and profitable operations, while eliminating contamination.”

Each issue of the Eriez Orange Connect Food e-newsletter highlights the latest product innovations from Eriez. The company offers a wide array of products for food processing, including Inspection Systems, Metal Detectors, Vibratory Feeders and Conveyors, Magnetic Separators, Screen Separators and more.

Eriez Orange Connect Food e-newsletters also include case studies profiling Eriez customers and describing their experiences with Eriez’ products and services. Special issues highlight food processing trade shows and industry news.

Back issues of the Orange Connect Food e-newsletter can be viewed at <http://en-us.eriez.com/products/orangeconnectnewsletters/> To subscribe to the e-newsletter, email eriez@eriez.com

Eriez is recognized as world authority in advanced technology for magnetic, vibratory and inspection applications. The company’s magnetic lift and separation,

SOLUTIONS FOR FOOD INDUSTRIES

When Davis Cookie decided to upgrade its production system, the cookie-maker approached Eriez about developing a volumetric feeding system that would provide storage for the sugar, as well as an even waterfall flow of the product on cookies traveling on the baking belt. Davis Cookie subsequently installed a special portable volumetric feeder consisting of a triangular-shaped storage hopper with an adjustable gate opening for control of sugar flow. The linear motion of the feeder provides an even flow of sugar on to the cookies, resulting in a better quality end-product.

X-Ray Inspection Systems

Eriez' E-Z Tec® Inspection Systems use advanced linear array technology that is unrivaled in the industry for its sensitivity, speed and sophistication. Eriez' E-Z Tec® Inspection Systems are available only in the United States and Canada. As a member of the global Sapphire Alliance, Eriez brings more than 20-years of X-Ray experience to the marketplace. Count on Eriez for superior products and service.

Metal Detectors - Food Processing

The extremely sensitive E-Z Tec® Metal Detector detects ferrous and nonferrous metals down to one-half millimeter in size. Detection takes place as the feed material passes the center of the aperture. Metal contamination is recognized and a signal is generated, activating a reject device.

Free Pull Test Magnet Inspection

Eriez pioneered the adoption of standard test equipment for determining the relative strength of magnet separation equipment. Need to check your magnet strength? Contact Eriez to arrange for one of our magnet specialists to visit your facility and pull test your permanent magnets **free of charge!**

ProGrade® Plate Magnets

Eriez' Plate Magnets are designed to remove ferrous contamination from products traveling in chutes, spouts, ducts, pipes and conveyors. Eriez' Plate Magnets include Eriez exclusive "ping" style hinges for easy cleaning and are all stainless steel construction in Ceramic and Rare Earth models.
